Supply chain solutions

Supply chain solutions

A well-managed supply chain can be a competitive advantage to an organization. We provide an end-to-end Supply Chain Solutions from costing the product to supporting through-out proto build to volume requirements, raw materials, cable assemblies, box builds etc. Major streamlining happens with an end-to-end Supply Chain Solutions. We support every process through the project be it, to cut cost, streamline processes, finding alternates to parts, Strategic Sourcing, Procurement, Logistics, Distribution.

Inteleqtech Supply Chain Solutions – Your Step Towards Success

With the versatile quality to connect the buyer and seller in the most amicable manner, Supply Chain Solutions facilitate business to be dealt in a more systematic and organized manner. As the world has become a global village, business has grown and companies are selling their products across the globe. This in turn raises the need of a well defined demand and supply system to keep the inflow and outflow of products in the right order.

The Importance of A Supply Chain Solution

Inventory and management are key players in the intricate mechanisms of any business or enterprise. They must be done well so everything will be flowing smoothly. A business is not necessarily a gamble. When you invest money, you have to work hard to ensure that the return of investment will be good. In order to do that, you must be aware of all the intricate processes involved in your business up to the smallest detail. Having a supply chain solution to do that will be of immense importance and advantage to you.

The supply chain is a network of suppliers, distributors, retailers, manufacturers, or essentially everyone involved in the making and distribution of a product. It will include all the players that handles the product right from the raw materials to the finished product, and up until it is sold to a customer. It is important to optimize and keep track of this network to ensure the smooth flow of the business.

Global Sourcing

Global Sourcing

In the very competitive world, we support in providing best solutions on when to buy, where to buy the components you need to deliver your products at best price, quality & in-time. Our Global Sourcing expertise is what you need when you are trying to define & optimize the cost of your product and to see all possible alternates through-out the project design-to- proto-production.

For whom is Global Sourcing of interest?

For businesses where raw materials and semi finished products represent an important part of their turn over. But also for trade and distribution enterprises importing finished articles.

- ✔ Research beyond the business plan
- ✔ Marketing options and rates
- ✔ The ability to turnaround consulting
- ✔ Help companies into more profitable

Logistics

Logistics

Successful project execution happens by delivering to customers before time. We focus on logistics which is more than exchange of goods. Smart and sustainable business requires the skills of logistics experts who think ahead.

Inteleq tech is backed by Authorized Economic Operator (AEO) approved best-in-class forwarders & clearing agents. Expertise in method to comply as per the provision and procedure as customs compliance smoothens the operations and to provide lowest landed cost solutions.

This strategy is based on three primary keystones:

We help companies manage their flow of goods from receiving to storage to order processing to shipment. And you thought we just delivered packages.

- ✔ Partnering with world class organisations to provide a global competitive advantage for our clients in their chosen markets.
- ✔ Making use of an information-driven supply chain solution that uses the right skilled people and integrates well with our customers' supply chain requirements.
- ✔ Understanding our clients' businesses by becoming an extension of them, anticipating their supply chain challenges and solving them quickly.
